

Dell XPS 13

Designed to be the best performing notebook of its size

The smallest 13-inch on the planet with the world's first infinity display

We did it again. We cleverly fit a stunning 13.3-inch display in an 11-inch size laptop, making the XPS 13 the smallest 13-inch laptop on the planet. The XPS 13 has a unique virtually borderless infinity display, with only a 5.2mm bezel on the top and both sides. That's the thinnest frame on a notebook today. What does all of that mean to you? There's less bezel, so there's more to enjoy. You can literally take your view to the edge, no matter what you are doing.

Stunning view from any angle

Enjoy eye-popping clarity and detail with an UltraSharp™ Quad HD+ display, which boasts an incredible 5.7 million pixels. That is 4.4 million more pixels than an HD+ and 2.5 times that of a Full HD display. High resolution means whatever you are doing, your image is precise and clear. With IPS wide-viewing angles, you can enjoy 170° views on a brilliantly bright, 400-nit screen. High color gamut and contrast ratio provide rich color. Movies come to life. Presentations shine. And photos can be edited with pinpoint precision.

Battery life leadership

The XPS 13 has the longest battery life of any 13-inch laptop*, getting over 18 hours¹ of run time on a single charge. On the go for even longer? Get up to 10 additional hours⁴ of battery life (up to 28 hours^{1,4} total) with the Dell Power Companion. A power reserve for all of your devices (PCs and tablets), it quickly charges via your power adapter.

So much punch, so little effort

We've packed more power into an already incredible design. The XPS 13 packs a 6th generation Intel® processor up to Core™ i7 and Intel HD Graphics* 520 into its slim frame (9-15mm). Memory now is expandable to 16GB, and at a faster 1866MHz, enabling you to get to your data quicker. With solid state drives, the XPS 13 boots from cold in seconds. And whatever state it's in, it comes back in a snap. Aside from doubling the maximum solid state capacity to 1TB, the XPS 13 now also offers faster PCIe drives. And here's the kicker, the XPS weighs as little as 2.7 lbs.*

Thunderbolt™

The XPS 13 features a new Thunderbolt 3 port, which is the newest generation of Type-C connectivity, enabling up to 8x the transfer speeds of USB 3.0 at up to 40Gbps and is twice as fast as Thunderbolt 2. It is a multi-use port than can charge your device, power up to two 4K displays and supports one cable docking.

Windows 10

Windows 10 gives you all the features you know from the world's most popular operating system, plus great improvements you'll love. Easily interact with your own personal digital assistant: Cortana. Using Cortana with the XPS 13 equipped with MaxxAudio® Pro by Waves gives you a natural voice interaction experience. You'll feel like an expert from the get-go since your Windows Start menu is back in an expanded form. Stay untethered for even longer: all Windows 10 devices now have Battery Saver to automatically conserve power so you can get more done for longer.

Dell XPS 13

Designed to be the best performing notebook of its size

Easy inputs

Always an XPS standard, the XPS 13 comes with a backlit keyboard, for anytime, anywhere usage. Keys are illuminated so you can use your keyboard in low and no light situations. Dell's precision touchpad delivers improved performance, making every click count. Your touchpad will deliver the exact action you intended, every time. Precision touchpads deliver fluid panning, pinching and zooming, for an experience that's touchscreen-smooth and quick, and even use gestures similar to the ones you make on screen.

Crafted without compromise

XPS laptops are artfully constructed with premium materials for maximum durability. Sleek and beautiful overall design is a side effect of careful performance driven construction. Machined aluminum provides strength and durability. The top cover and base are precision cut from a single block of aluminum. The carbon fiber palm rest is strong like aluminum, and thin, but feels cooler to the touch. Finally, edge-to-edge Corning® Gorilla Glass NBT™ on the QHD+ display is bonded to the aluminum display back for added strength. With these materials, XPS products are strong and durable, look stunning, and feel even better in your hands.

Built for business

XPS is doing more than ever before to ensure it fits into a business environment. The XPS 13 has all of the manageability and select security features of Latitude™ in an aggressively thin and competitive form factor. The most manageable 13-inch laptop and best-in-class security for commercial customers. With the new Thunderbolt™ 3 port, the XPS 13 now offers the next generation of Latitude docking, using only one cable. Both the Dell Thunderbolt dock and the Dell Dock are easily connected with one cable. (Docks sold separately).

Designed with the environment in mind

XPS laptops are among our greenest laptops ever. From our design decisions to the product and packaging we choose to our recycle options for your old PC, the environment is top of mind. XPS laptops are designed with smarter materials, by avoiding materials of concern including cadmium, lead, hexavalent chromium, mercury, some phthalates, and they are all BFR/PVC-free.¹ All XPS notebooks ship in recyclable, compost-friendly packaging, including our highly renewable bamboo trays, and we offer options to responsibly recycle your old product through our reconnect partnerships. With presence in 78 countries, Dell has the widest reach of free consumer take-back offering in the industry with consumer drop off in over 2400 Goodwill locations in North America. Without exception, all XPS notebooks are ENERGY STAR® qualified and anticipated EPEAT Gold registered.
